1. [2★ | 👍 230 | 2023-07-02T20:20:52 | G L] This is not an ad-supported or free version, but only a free trial. Users should be told up-front, before bothering to download, before the app does its data gathering, that the 'free' version is only a 7 day trial, after which it will automatically charge \$39 a year. No scummier than most apps, but that's a low bar. If you're into being manipulated, the graphics look good, and a lot of thought went into the proce...

2. [1★ | 👍 204 | 2022-12-26T21:00:46 | Phil Johnson] I used to love this app and recommend it. In the last 3 weeks the pop up ads have gotten so frequent I can't stand it anymore. On top of that, the ads have become videos that you CANNOT stop and close. That was it for me. I understand the ad supported model, but it's now crossed the line to be so annoying I am moving to a competitor. Edit - the auto-bot reply was how to pay to stop the ads. It's clear they do not ...
3. [1★ | 👍 202 | 2023-06-19T00:17:59 | Sara F.] WARNING: Pop-Up ads will take over your phone! Ad music plays the entire time I am using the app, even if an ad does not pop up. Lately it's been the music for the awful Star Trek ad, but it changes. The music will continue to play until I close the app. If I exit the app but don't close it, the music plays over everything else on my phone. It happens every time I use the app, making it annoying and useless.
4. [1★ | 👍 180 | 2025-01-03T15:35:59 | Joshua McCulloch] Shady cancellation practices. I wanted to cancel my yearly auto renew. The app tells me to log into the website by clicking 'login at top right'. That option isn't there, nothing is in the top right. Clicking the 'become a member or log in' opens up Google play to install the app. I've been clicking around the website for ten minutes and can't find a way to log in that doesn't direct me to the app, which I can't c...
5. [1★ | 👍 174 | 2023-03-03T19:23:21 | Derek S.] I've never written a negative review. And I didn't think my first would be for lose it! But as others have been mentioning lately, the ads have gone over the top. I'm currently on a 842 day streak. The app itself is great, but over the years since my initial use of it, I've seen the ads slowly become more intrusive. It's at the point now I have no choice but to switch back to MyFitnessPal. Half the time, trying to...
6. [2★ | 👍 166 | 2024-02-21T21:22:53 | Riley James] I used to love the app. Useful features and a clean UI. However, over the years, the ads for "premium" subscription have gotten more and more aggressive, at least 3+ popups before you can actually use the app. And now, developers have removed basic functionality and features (like scanning barcodes) that used to be free, and put them behind a subscription in a blatant cash grab. After 4 years, I will be uninstalli...
7. [2★ | 👍 150 | 2025-10-08T01:26:46 | S R] latest update is TERRIBLE. now a large panel of redundant buttons pops up when you "add food" all those buttoms are already available on this page, but now I can only see two food choices. The food choices are now larger and even less compact than before which also limits what you can see. PLEASE make everything more compact so we can see more than one or two items on any given screen, and stop those buttons from ...
8. [1★ | 👍 141 | 2024-02-19T19:05:10 | J C] I've used lose it off and on for years. I just reinstalled it and found out that I can no longer scan barcodes unless I want to go premium. It's one thing to pay for some features that make the experience more in depth and desirable

but how can one even use an app such as this without scan feature is beyond me. It would be more hassle then the app is helpful. It should be included in basic plan. Please note, if mo...

9. [1★ | 👍 133 | 2023-01-14T21:53:14 | **Sal Leonardi**] I've used the free version on & off since 2014. Last year, I upgraded to the paid version. Everything was great, all options unlocked, no ads. A breeze to use. Since last week when my annual membership expired, at random moments I've been getting full-screen ads (which you are held hostage to view in their entirety). I found an option where I can pay \$9 to rid my app of all ads, for life. But for a \$9 ransom, you ...
10. [3★ | 👍 130 | 2024-11-14T17:33:34 | **Paul**] I was very impressed my this app at first. The layout is good and practical and the database is nicely fleshed out. I started to get a bit unhappy when I found that barcode scanning was behind the paywall, which is unusual for this sort of app from my experience. Over time such annoyances have added up. I had a lot more to say but hit the limit. Put more succinctly, it's a great app that's dragged down badly by it...
11. [3★ | 👍 128 | 2024-09-11T23:25:57 | **Daniella Hott-Barham**] I like the app but I'm not paying \$40 just to have a barcode scanner and the ability to connect my Fitbit. I can do those for free on MFP. It is on sale right now but I can't justify paying \$20 for something I get free on another app. If you have to pay for those options then you should offer a free trial. That way we make sure we like it before committing.
12. [1★ | 👍 118 | 2023-12-20T18:07:37 | **Sneaky Snape**] Not worth a damn. This app used to be free. Came back several years ago then it had some options to pay for and one free option spammed with ads. Now come back a third time and there is no free option. Not interested. Gonna look into other apps. I could do this pen and paper for free I guess if they all cost charge monthly now. Who needs another annoying bill when you're just trying to do better for yourself? Lame.
13. [1★ | 👍 118 | 2024-03-04T13:12:57 | **A Very Angry "Moosey" Mosen**] Purchased lifetime since I'd been using the app for years at this point. Functionality is great, very useful, only ever had one hiccup that got resolved in a later patch anyway. After the latest update, I am getting ads for a 3rd party keto diet course that no matter how many times I say no thanks, it will not go away. It is very annoying to have a life time membership and STILL get ads, for a service I don't want...
14. [1★ | 👍 109 | 2024-05-14T23:33:57 | **Brandi Thompson**] I've had Lose It for years but in the last few months they have increased the number if pop ups and ads to the point where every click you get a new ad. Not only that, but now they are taking previously free features (barcode scanner) and locking them behind a pay wall. I understand that apps need to make a profit, but at this point it's just greed. I would have been more likely to buy membership if they were deve...

15. [3★ | 👍 106 | 2025-12-05T16:41:54 | Catherine Williams] The advertising has become less aggressive, but the adverts still go on too long. I find it's actually quicker to click out of the app & go back in than watch the whole add, which surely defeats the object of the advertisers. If they made the ads shorter they would be less annoying & id probably watch them.
