1. [2★ | 👍 453 | 2022-10-01T23:47:39 | Tiffany Back] I used the app for years and the barcode functions made it easier to use, especially when you can't find the food items in just a search. It's too much of a hassle to continuously search for items that are hit or miss could be easier to

scan in a second, but to pay for a function all of a sudden seems ridiculous. And the premium prices is too high.

2. [3★ | 👍 353 | 2022-10-01T22:31:22 | Jimmy Maches] Like a lot of other people, I've been using this app for years and it has helped me lose and maintain my weight and fitness. With the newest change making the barcode scanner a premium feature I will be uninstalling the app. The premium features just aren't worth the \$80/year price tag. Everything is becoming subscription based and I'm tired of it. For those looking for a free alternative, Fitbit app allows barcod...
3. [2★ | 👍 341 | 2025-09-06T20:47:50 | Courtney Bolton] While I have been using the app since 2013, the latest update has ruined the functionality of the app. Previously, I could type a brand name into the search and pull up recent items. Now I have to type in a keyword from the item description. Bring back the ability to search by brand! It also deleted all my recent foods and I now have to re-enter them. An update should make the app better, not break previous functi...
4. [2★ | 👍 195 | 2025-09-09T19:16:21 | Nick] This used to be a great app, but the most recent update is a major step back. Meals you save and then use on another day used to put the exact foods, so you could easily customize amounts. Now the meal gets added as a single item Search algorithm got a huge downgrade. You used to be able to search by maker and no longer can. Searching Starbucks in my recents doesn't bring up my Starbucks drinks, I now need to type...
5. [1★ | 👍 159 | 2025-09-21T19:54:58 | Sara Vnuk] What Am I paying for, if every time I do a search for something I ate within the last day doesn't show up? This is annoying and time consuming. There really isn't much of an advantage to paying for a premium membership if I have to go through all the extra work to find the foods that I'm commonly eating anyway. Perhaps it's an algorithm change to get people to pay for the premium plus. Regardless, I likely will no...
6. [3★ | 👍 156 | 2025-03-03T16:49:47 | Rhonda Allen] UPDATE: I had to take this down to 3 stars now because as of how this app has become BOMBARDED with ads AND you can no longer scan barcodes without paying for the premium version of the app which also, by the way, removes the ads. How convenient! Otherwise it's a good app for tracking your food entries and viewing your nutritional intake. Those ads are very annoying though. If the cost wasn't so high I would consi...
7. [2★ | 👍 155 | 2024-03-02T21:40:49 | Tricia Rickard-Becker] Very disappointed with app now days. Features and usability was much better a few years ago. Some options that used to be free are now hidden behind a pay wall. About \$20 a month or \$80 a year (with current special) is more than I'm willing to pay to see if I get functions I had before. Map my walk no longer syncs well with it. (Yes I have the current edition of both) It's become very unsuitable for my purposes Se...

8. [2★ | 👍 153 | 2022-09-01T15:17:53 | Zack Sikora] Used to love it. stores what i eat for quick use. But once it was sold to another company, they're really pushing premium mode. Ads are getting more obnoxious and annoying and you can no longer use scan mode unless you go premium. You can still manually search for foods but I'm guessing it's a matter of time before that feature is removed for non premium users to try and force you to upgrade. In short, now it's ju...
9. [1★ | 👍 150 | 2025-05-22T22:48:12 | Dawn B] I've been using this app for years, and I have no problems with adding exercises to the diary until yesterday. Now when I click add exercise, the options for the type of exercise come up, but when I select any of them, the exercise window just disappears. Hard to track calories in and calories out if I can't input exercises. Please fix.
10. [1★ | 👍 123 | 2025-04-30T08:36:19 | Brian T] Edited Rating to 1-star. App is pretty sub-par these days. Does not sync with my Fitbit app to transfer calories burned and steps. This doesn't work regardless of syncing is done via HealthConnect (updates sporadically and randomly) or directly with Fitbit. The entire platform is becoming useless if it cannot track the most basic and relevant metrics. Disappointing as a paying subscriber. Will cancel if it isn't r...
11. [3★ | 👍 118 | 2025-04-15T13:18:52 | Ward Furman] Good but features keep becoming premium. This morning I went to enter my food, and after I searched and found what I wanted, entered the quantity and went to add it to my diary it wouldn't respond. I've tried closing and reopening the app. uninstalling and reinstalling it. The only thing I can figure is that now the food diary has become a premium feature as well. Very quickly becoming a useless service if you don...
12. [3★ | 👍 103 | 2024-09-29T03:41:26 | Nicholas & Francesca] App is running worse & worse, day by day. This app used to be the best. I recently installed MFP because I started a serious weight loss goal. At first it was working perfectly. I'm familiar with MFP because I had used it 5 years ago to lose weight & it 100% helped me reach my goal then. Now, the app is VERY unreliable. It never picks up my steps from my fitness watch or other apps like Map My Fitness. It's adding...
13. [1★ | 👍 103 | 2025-03-25T19:37:20 | Isaac Surh] Terrible, terrible design. User interface is the most confusing, non-intuitive design imaginable. Also, wildly inconsistent calorie counts for food items. I typed in 1 cup cooked quinoa and saw search results ranging from 120 calories to 225. The search results appeared crowd sourced, so accuracy is dubious. People just write in their opinions, defeats the purpose of counting calories. Stay away from this app.
14. [3★ | 👍 100 | 2025-10-26T04:25:47 | Thé TrashCAN'T] Basic and counterintuitive with its layout, but otherwise it's pretty good for what it's worth, I've lost nearly 100 lbs! But the app's been getting more unstable these past few months. It's very laggy, the search bar shuffles around text as I type, I can't search for my own foods/meals anymore, and I keep getting

spontaneously get signed out. Yesterday I got signed out while using the app, and it reset some of my...

15. [2★ | 👍 81 | 2024-04-25T16:01:29 | Dennis Hutton] Most useful tools are locked unless you pay. The “diary” for adding your food is horrendous. Once you create a meal, you can’t change or delete it. If you try to look for food, there are thousands to look through and 90% of them were entered wrong. So if you add another, it just makes the list longer. Thousands of the same exact item, just spelled differently. Changes are not saved or randomly doubles entries. You...

6. [1★ | 👍 156 | 2024-12-20T09:31:52 | b_ baayiaa] سأقوم بحذف التطبيق حاليًا على الرغم من فائدته لكن عدم وجود اللغة العربية أمر حائل بيني وبين الاستفادة منه، اذا تم إضافة اللغة العربية أعلموني بذلك.. بين فترة وفترة سأتي لتفقدته.. الآن حان الوقت للبحث عن تطبيق آخر، للحين كل فترة ادخل اشيك اذا ضافوا اللغة العربية وللأسف لا، ليش التعنت ذا رغم انها من أكثر اللغات المتحدثة في العالم.

12. [1★ | 👍 131 | 2025-08-16T12:27:29 | gle goo] لا يستحق حتى نجمة واحدة كيف يُعقل أن يدعم التطبيق أكثر من 19 لغة ولا يدعم العربية حتى اليوم؟! منذ سنوات والمستخدمون العرب يطالبون بإضافة اللغة العربية، لكن طلبنا يتم تجاهله وكأننا غير موجودين، هذا يُعتبر قلة احترام وتهميشًا لشريحة كبيرة من المستخدمين. إن لم تتم إضافة العربية قريبًا فسأضطر للتخلي عن التطبيق نهائيًا، لأننا كمستخدمين عرب نستحق التقدير مثل غيرنا
13. [2★ | 👍 128 | 2021-03-06T01:38:28 | Ahood A] هو جميل لكن لم استطيع الاشتراك لأنه لا يدعم اللغة العربية
