1. [1★ | 👍 412 | 2024-04-12T04:17:25 | Justin Armstrong] If you respect your time, your sanity, and want to actually track you calories with ease and keep track of your fasting period. DO NOT GET THIS APP. People rave about how there aren't any intrusive ads, but they fail to mention nearly everything is locked until you spend money. I apologize but a fasting tracker is literally just a timer that's connected to a graph and you want me to pay you for that? Spend some ti...

2. [2★ | 👍 309 | 2025-07-16T22:22:22 | JennyK] My previous review was 4 star, but I downgraded it because of recent changes. It used to be so convenient to open app, log meal, close app. Now you have to filter through multiple screens to get to where you can log meals... and I'm a Premium Member! Sorry Yazio, but I pay for convenience, and this app no longer qualifies. So long, and thanks for all the fish. I'm out of here.
3. [2★ | 👍 191 | 2024-11-26T20:04:55 | Finn Kysil] It's a good app, the only one I've seen that lets you select your country to give you food options from the stores here. But meal planning is impossible. The moment you exit out of one of the menus, it pelts you with stats, ads, premium subscription sales and "You've earned a streak freeze". It takes 6 taps to exit one menu. It's become so annoying, it's better to just close the app and reopen it.
4. [1★ | 👍 171 | 2024-01-06T17:21:41 | Jodi Schumacher] So far it's extremely frustrating. If you make an err, It's either impossible or a long frustrating process to correct. I accidentally entered my weight wrong. It won't let me change it. So, my total weight loss is inaccurate every day. Many times you can't enter the correct amount of food you've eaten. Like if you only ate a Tbsp of peanut butter, it only lets you choose oz. I signed up for Pro, it's too frustrat...
5. [2★ | 👍 138 | 2022-10-31T17:30:10 | Maurice] Certain changes to the app should not have been made. The price jump is insane to where it jumped from \$19.00 a year to to now \$85.00 year. Before the price was reasonable. Not for sure for why this price increase. Makes me second guess the app now. Don't get me wrong, the app is still good and useful, but now i can't sync my polar flow app which was helpful.
6. [2★ | 👍 102 | 2024-01-12T07:17:52 | Adam Van Meter] If I had realized how central fasting was to this app I wouldn't have bothered subscribing, it seems like a pathway directly to disordered eating. I should have done my due diligence while researching counting and activity calendar apps. The vaunted barcode scanner is missing tons of things. Be prepared to spend a lot of time paying to do data entry for yazio, at least as far as the first times you eat certain thi...
7. [2★ | 👍 92 | 2019-12-31T22:13:59 | A Google user] The Update ruined it. Previously, the app was a breeze to use, priced well, and very useful. Now the UI is uglier and everything takes more time to input. For example, you can no longer see the brand of foods you search for unless you click into each item that shows up. Finding a particular food item in the database now requires numerous more clicks and a lot more time. It's genuinely a pain to use now and I can't...
8. [3★ | 👍 89 | 2019-11-20T09:56:25 | A Google user] Truly disappointed with the newest update, makes everything complicated, food searches take forever to load, and the days are all wacky, some days won't come up, some are repeated. When looking at your diary you have to go into the meals to view whats in them whereas before they were simply displayed on the page. It was a terrible idea to change the app when it was just fine the way it was, and even more upset tha...

9. [3★ | 👍 85 | 2023-10-09T21:38:59 | **Listen Carefully**] Downloaded for calorie counting, and while there many options for food input, there are no options for deleting foods or meals from what has been logged. So if I accidentally press the plus sign on an irrelevant food, or create a meal but add everything twice (which is easy to do when first navigating the app), it's stuck like that. Additionally, the vitamin and mineral content is very incorrect! (Super improtant)...
10. [1★ | 👍 78 | 2025-12-20T22:25:06 | **Alinanas**] I've been using Yazio for a long time now, and I have to say it was way better back in the day. They added ADs after EVERY. SINGLE. LOG and it's extremely annoying. And not only that, but they also removed the feature of you being able to add your meals for the next day in advance. This used to be my favorite tracking app and I have to admit it's still fine for tracking, just the constant reminder to pay pay pay i...
11. [1★ | 👍 76 | 2019-08-14T15:29:36 | **A Google user**] Worthless. Do not get this app! All this is, is a fancy calorie counter and goal timer with some recipes. You have to pay to use any potentially useful features. I paid not knowing everything that was offered. Once I opened the paid version I was extremely disappointed in what was actually offered. My Fitness Pal offers almost all of the same stuff in their free version so WHY would anyone pay 20 bucks for 1 or 2 ...
12. [3★ | 👍 74 | 2024-08-05T19:13:55 | **Ryan Pavlik**] The inane and lengthy "welcome back" dialog chain is horrible, please stop. This app is, as an app, definitely better than "that other one." But it's limited: you can only sync from *one* brand of device; add another and it switches. (Google Fit, no... many devices don't sync fully or at all.) Polar support is broken enough that I went back to manual entry. Nor is it particularly innovative about food handling, an...
13. [3★ | 👍 71 | 2024-08-26T11:27:53 | **Federico Campoli**] The app is good for losing weight and helped me to return in shape. However recently I had to switch to another one as clearly yazio is no longer improving. First the integrations. The compatibility with garmin just doesn't work. Secondly the the food modification has to go through their review that never happens. I entered my own food with small errors that are still there after one year. It's a shame because I l...
14. [1★ | 👍 66 | 2025-12-17T18:31:47 | **evie**] i have used this app for well OVER a year. it helped me with my calorie goals and building muscle, but they lost me now. there is WAY too many ads, the pro version "limited time deals" are a scam, and now, the most BASIC feature like tracking a meal ahead of time is locked behind a paywall. i would've paid for it, given how much i use it, but i am sick of having to subscribe to every freaking thing. uninstalling now.
15. [3★ | 👍 58 | 2019-03-06T02:25:48 | **A Google user**] Good app. Overall the interface is well designed, easy to navigate and easy on the eyes. Great that it can sync with other fitness trackers. A few complaints. They way the app deals with servings/units is confusing resulting in many erroneous food entries in their database. I am having to reference nutritional info on my food packaging to make sure the macro nutrients per serving are correct which takes a lot of t...
